Infor Analytics

Make data a competitive advantage

Make data a competitive advantage and turn siloed information sources into synchronized ones with Infor's comprehensive business intelligence tools and innovative integration capabilities. Right from your mobile device, you'll have access to robust reporting capabilities, analytics pre-built to meet specific industry needs, personalized dashboards, workflows and alerts—with changes synced automatically to your desktop. The result? Your business software is no longer a one-way street.

Get software that talks back

With Infor™ Analytics, you get software that talks back, monitoring critical processes that you identify and letting you know of potential problems anytime, anywhere. You can drill down into issues, analyze them on the spot, and get the information you need to keep things from getting out of control. You'll be able to:

- Transform information into actionable insights.

- Monitor and drive your business anytime, from anywhere.

- Unlock the potential of data in previously siloed enterprise applications.

- Speed decision making with personalized dashboards and role-based analytics.

- Proactively address problems through workflows and alerts.

Improve decision making with information at your fingertips

Infor Analytics gives you a comprehensive business intelligence platform that can be used in any domain or industry. Powered by an in-memory database, the solution offers a unique, multi-purpose web front-end, as well as mobile capabilities that put information at your fingertips. Easily integrated with both Infor and non-Infor data sources, Infor Analytics lets you take advantage of information that resides in previously disconnected systems and get a real-time view of your entire business operation. You get all the tools you need to analyze, manage, and drive your business in one complete package. These include:

- **User-friendly reporting tools and pre-built reports** that are ready to use right out of the box, so you can put the power of analytics directly into the hands of power users, without help from IT.

- "**What-if" scenarios and driver-based planning** to improve both the quality of decisions and your confidence in them.

- **Automatic synchronization of information** through the innovative Infor ION Business Vault, which monitors, organizes, and stores your business data.

You also have access to role-based reports and industry-specific KPIs that let you be productive immediately and more easily meet the specific needs of your users, business, and industry. You have access to role-based analytics in areas such as:

- **Finance**—Keep track of actuals and budgets for revenue and costs, profit and loss, balance sheet, and cash flow statements, as well as cost center information.

- **Sales**—Track sales orders, bookings, revenues, and gross profits, and analyze both sales performance and profitability by product and customer.

- **Operations**—Monitor critical factors like production orders, in-time production, and quality.

Based on decades of industry experience, Infor Analytic's industry-driven analytics include capabilities for:

- **Healthcare**—Identify cost savings opportunities, improve hiring and personnel management, and increase collaboration with analytics built by healthcare experts specifically for the healthcare industry.

- **Hospitality**—Get a real-time view of your business, analyze key metrics such as occupancy rates and profitability by outlet, and increase profitability with analytics built to meet the unique needs of the multi-faceted hospitality industry.

- **Manufacturing**—Get a big picture view of key metrics such as total business inventory and manufacturing throughput, detect drivers for quality issues, and more, with pre-packaged, easily integrated reports and dashboards based on decades of experience.

> **Drill down into issues, analyze them on the spot, and take action anytime from anywhere. With Infor Analytics, you'll get the information you need to keep things from getting out of control.**

Transform information into actionable insight

With Infor Analytics, you'll get a real-time view across your organization and unlock the power of previously siloed data sources. You can let your systems do the work for a change, delivering information about exceptions and potential issues automatically—wherever you are. You'll make better decisions more quickly, be more responsive, and solve problems proactively, rather than reactively.
